

Sandra Day O'Connor FFA Agriculture Science program provides education and training that prepares an individual for careers in a diverse group of occupations. Our program

consists of 3 elements: classroom instruction, supervised agriculture experiences and Leadership Development and Career Development Events. The FFA has the unique characteristic of banding families in the program together, helping advance the program and the students toward success.

In the Fall, O'Connor FFA participates in Leadership Development Events that focus on creating situations for members to demonstrate their abilities in public speaking, decision making, communication and their knowledge of agriculture and the FFA organization.

In the Spring, we practice Career Development Events such as: agriculture communications, agriculture mechanics, agriculture sales, meats judging, horse judging, livestock judging, marketing plan development, poultry judging and wool judging.

In addition there are numerous opportunities for members to develop leadership, public speaking and personal growth skills.

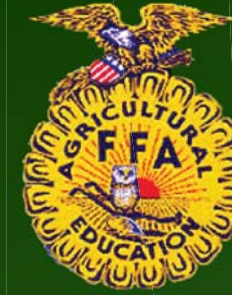

What the Golf Tournament will do:

Provide additional scholarship opportunities for these young men and women, while showing community support of their goals. By showing this support these young men and women will get a sense of accomplishment and willingness to give back when they enter the business world.
